A .mobileconfig file for use with iOS for iPhone/iPad/iPod and MacOS® Mail.app® for Mountain Lion (10.8+) is attached to this message.

The remote computer's location appears to be: Mexico (MX).

The remote computer's IP (Internet Protocol) address is assigned to the provider: "This network range is not fully allocated to APNIC. If your whois search has returned this message, then you have searched the APNIC whois database for an address that is allocated by another Regional Internet Registry (RIR). Please search the other RIRs at whois.arin.net or whois.ripe.net for more information about that range."

The provider supplied the following remarks about the IP (Internet Protocol) address allocation: "For general info on spam complaints email spam@apnic.net. For general info on hacking & abuse complaints email [abuse@apnic .net](mailto:abuse@apnic.net)."

The system generated this notice on Friday, September 13, 2024 at 5:17:50 PM UTC.
